Subject Index

ABH human blood group substance
- representation in the dog, 228

ABO human blood group system
- relation to HB antigen carrier state, 89

A finn human blood group antigen
- basic characteristics, 385
- population studies, 404
- variant of blood group A, 385

A human blood group antigen
- variant A finn, basic characteristics, 385

Ag β-lipoprotein antigen
- Ag(h), 264

Agglutinin
- accompanying warm haemolysin, 12
- human saliva to rabbit erythrocytes, 515
- trypsin treated red blood cells, 12

Ag(h) β lipoprotein antigen, 267

A human blood group antibody
- fluctuation of natural high titre antibody in Ugandans, 472
- IgG, partial neutralization characteristics, 246
- IgG saline agglutinating activity, 246
- IgG, thermal optimum, 246

A human blood group antigen
- A finn, population studies, 404

Am human blood group phenotype
- reduced A secretion, 216

A2 human blood group phenotype
- H-deficiency in Africa, 165

A2B human blood group phenotype
- H-deficiency in Africa, 165

$A_2m(2)$ immunoglobulin A antigen, 481

Antiglobulin antibodies
- after Rh (D) antibody administration, 33

Au/SH antigen
see HB antigen

Au/SH antibody
see HB antibody

Autoimmune haemolytic anaemia
- chronic hepatitis, antibody specificity, 331

Autoimmune hemolytic anemia
- IgG cold incomplete antibody, 236

B human blood group antibody
- fluctuation of natural high titre antibody in Ugandans, 472

Blood storage
- leucocyte count, 261

Chronic hepatitis
- autoimmune haemolytic anaemia, antibody specificity, 331

Coelacanths
- limited blood group tests on two samples, 175

Cold agglutinins
- chemical analysis of heavy and light chain variable regions, 432

Do^b human blood group antibody
- description, 382

Dombrock human blood group system
- Do^b antibody, 382

Duffy human blood group antigens
- fetal red cells, 372

Duffy human blood group system
- Fy 4 antibody, 337

Duffy human blood group system
- Fy^xFy^x genotype, 264

Duffy human blood group system
- no close linkage with Ko platelet system, 1

Duffy human blood group system
- probable association with Rh system, 193

En^a human blood group antibody
- second finnish En(a–) propositus, 545

En (a–) human blood group antigen
– action of seed agglutinins, 48
En (a–) human blood group phenotype
– second finnish propositus with En^a antibody, 545
Erythrocyte preservation
– rapid and slow chromium elution *in vivo*, 502
Erythrocyte test cell panel
– modified liquid nitrogen container, 94

Factor I stability
– storage in ACD-A blood, 377
– storage in CPD blood, 377
Factor II, IX, X
– therapeutic concentrate from citrated, factor VIII depleted plasma, 441
Factor V
– preservation in ACD-A blood, 126
– preservation in CPD blood, 126
Factor VIII
– preservation in ACD-A blood, 126
– preservation in CPD blood, 126
Factor IX, II, X
– therapeutic concentrate from citrated, factor VIII depleted plasma, 441
Factor X stability
– storage in ACD-A blood, 377
– storage in CPD blood, 377
Factor X, II, IX
– therapeutic concentrate from citrated, factor VIII depleted plasma, 441
Fetal red cells
– Duffy antigens, 372
– Kell antigens, 372
– Kidd antigens, 372
– Lutheran antigens, 372
– Xg^a antigens, 372
Fy 4 human blood group antibody, 337
Fy 5 human blood group antibody
– probable association between Rhesus and Duffy, 193
Fy^x Fy^x human blood group genotype, 264

Haemagglutinins
– naturally occurring against trypsinized red cells, 283
Haemolytic disease newborn
– Rh (-D-/-D-) indian woman, 280
HB antibody
– frequency in patients with paraproteinemia, 477
– radioimmunoprecipatation assay, 58
HB antibody detection
– hemophilia patients, 66
– voluntary blood donors, 66
HB antigen
– frequency in patients with paraproteinemia, 477
– plurality of determinants, 366
HB antigen carrier state
– relation with ABO or Rh blood group, 89
HB antigen determination
– haemagglutination(inhibition) technique, 528
Hemolytic anemia
– Rh_{null}, hypothetical explanation, 417
H human blood group antigen
– stability during storage at 4 °C, 362
HI human blood group antigen
– stability during storage at 4 °C, 362
HL-A antigens
– kidney cells, 289
– micro-immune adherence assay, 289
HL-A system
– new allele U18, 187
– no close linkage with Ko platelet system, 1
Hov human blood group antigen
– description, 535

I human blood group antigen
– stability during storage at 4 °C, 362
Immunoglobulin A allotype
– $A_2m(2)$ antigenic marker, 481
Immunoglobulin G subclasses
– placental passage, 206
– presence and origin in newborns, 206
Immunoglobulin heavy chain
– chemical analysis variable region of cold agglutinin, 432

Immunoglobulin level
- Trio and Wajana indians of Surinam, 457
Immunoglobulin light chain
- chemical analysis variable region in cold agglutinins, 432

Kell human blood group antigens
- fetal red cells, 372
Kell human blood group system
- K 12 antibody, 200
- no close linkage with Ko platelet system, 1
- three further antibody specificities, 179
Kidd human blood group antigens
- fetal red cells, 372
Kidney cells
- HL-A antigens, 289
Kidney transplantation
- secondary stimulation of Rh antibodies by grafts from positive donors, 524
Ko human platelet allo-antibodies
- cross-reactivity, 1
Ko human platelet allo-antigen system
- gene and phenotype frequencies, 1
- new linkage with HL-A, Rh, MNSs, Kell, Duffy, Lewis, 1
K 12 human blood group antibody
- association with Kell blood group system, 200

Latimeria chalumnae
- limited blood group tests on two samples, 175
L-dopa
- induction serological abnormalities, 171
Leucocyte alloimmunization
- Rh (D) immunization prevention, 255
Leucocytes
- stored EDTA blood, 261
Lewis human blood group system
- no close linkage with Ko platelet system, 1
Liquid nitrogen container
- erythrocyte test cell panel, 94
Lu 9 human blood group antigen
- description, 468
Lutheran human blood group antigens
- fetal red cells, 372
Lutheran human blood group system
- Lu 9, 468
- genetics of dominant inhibitor, 42
LW human blood group auto-antibody
- cold reacting IgG, 150
- comparison with immune antibody, 150

M human blood group antibody
- naturally occurring, 134
Micro-immune adherence assay
- HL-A antigens on kidney cells, 289
MNSs human blood group system
- no close linkage with Ko platelet system, 1

N human blood group antibody
- IgG in NN donor, 134
- naturally occurring, 134

Paraproteinemia
- frequency of HB antibody, 477
- frequency of HB antigen, 477
Persistent mixed field polyagglutinability
- immunofluorescence study in genetically abnormal red cells, 489
Plasma storage
- freezing in 5-litre bags, 550
Platelet preparation
- modified gelatin, 76
Pr_1/Pr_2 human blood group antigens
- reflection on dog erythrocytes, 354

Rh(D) antibody containing immunoglobulin
- antiglobulin antibody production after administration, 33
- residual anti-D antibody after intramuscular administration, 33
Rh (D) antibody containing plasma
- antiglobulin antibody production after administration, 33
- residual anti-D antibody after intramuscular administration, 33

Rh (D) human blood group antibody
- class and subclass characterization after booster injections, 323
- high titre antibody production in male volunteers, 425
- range expander in automated quantitation, 181
- role of zeta potential in agglutination, 273
- secondary stimulation by kidney transplantation, 524

Rh (-D-/-D-) human blood group genotype
- haemolytic disease newborn, 280
- Indian woman, 280

Rh (E) human blood group antibody
- explanation negative anti-immunoglobulin test, 380

Rh human blood group system
- a complex-complex model, 21
- Fy 5 antibody, 193
- no close linkage with Ko platelet system, 1
- probable association with Duffy, 193
- relation to HB antigen carrier state, 89

Rh (D) immunization prevention
- antibody production in male volunteers, 425
- no protection against leucocyte isoimmunization, 255

Rh (D) immunoglobulin assay
- radial diffusion, 317
- electrophoretic precipitation, 317

Rh (D) low protein immune globulin
- activity, 301
- prophylactic value, 301
- Purity, 301
- Stability, 301

Rh_{null} human blood group phenotype
- hypothetical explanation hemolytic anemia, 417

Saliva
- agglutinins to rabbit erythrocytes, 515

Salivary blood group substance
- methodology quantitative studies, 97
- normal values quantitative studies, 114

Seed agglutinins
- action on En (a-) erythrocytes, 48

SH/Au antibody
see HB antibody

SH/Au antigen
see HB antigen

U18 human lymphocyte antigen
- HL-A system, 187

Warm haemolysins
- naturally occurring against trypsinized red cells, 283

Warm haemolysin trypsin treated red cells
- accompanying agglutinin, 12

Xg^a human blood group antigen
- chinese, 542
- fetal red cells, 372
- indians, 542
- malays, 542

Xh human serum protein antigen
- further studies, 343

Zeta potential
- Rh agglutination, 273

Vox Sanguinis

Journal of Blood Transfusion, Immunohaematology and Immunopathology
Official Journal of the International Society of Blood Transfusion
Organe Officiel de la Société Internationale de Transfusion Sanguine

Published in cooperation with the League of Red Cross Societies, Geneva

Advisory Board: S. T. Gibson, Washington, D.C. (USA)
Ph. Levine, Raritan, N.J. (USA)
W. d'A. Maycock, London (Great Britain)
G. W. Miller, Toronto, Ont. (Canada)
M. Shapiro, Johannesburg (South Africa)
Representing the International Society of Blood Transfusion:
T. J. Greenwalt, Washington, D.C. (USA), President
F. Jasso, Paris (France), Secretary-General
Representing the League of Red Cross Societies:
Z. S. Hantchef, Geneva (Switzerland)
Editors of Brief Reports:
North and South America:
E. Giblett, Seattle, Wash. (USA)
Europe:
A. Hässig, Bern (Switzerland)
Editors-In-Chief: North and South America:
F. H. Allen, New York, N. Y. (USA)
Europe:
L. P. Holländer, Basel (Switzerland)
Africa, Asia and Australia:
M. G. Davey, Perth (Western Australia)
Chairman: J. J. van Loghem, Amsterdam (The Netherlands)
